

Ayush Thummar

B.Tech Computer Science Engineering student with a strong enthusiasm for Artificial Intelligence and emerging technologies. Passionate about solving real-world problems through innovation. A nature lover with a curious and growth-oriented mindset

Projectes

2024

Scientific Calculator (C)

Team Member

Developed a command-line scientific calculator using **C language** that performs basic arithmetic operations along with advanced functions like trigonometry, logarithms, power, and square root. Implemented using standard math libraries with user input handling and function-based modular code design

2024

E- Commerce System (C++)

Team Leader

Led the development of a console-based E-commerce system using C++, enabling users to browse products, add/remove items to/from cart, and generate order summaries with dynamic pricing. Implemented modular class structures for Product, Inventory, and User, ensuring scalability and maintainability

2025

tarin scrching .com (HTML , CSS , JS, PHP, MySQL)

Solo Developer

Developed a full responsive clone of the Toyota India website using HTML, CSS, and JavaScript. Improved upon UI/UX flaws from the original by enhancing navigation, layout consistency, and visual design. Built all sections including homepage, product pages, and interactive features individually.

2025

Human Resource Management System(HTML , CSS , JS,PHP)

Solo Developer

Developed a full responsive clone of the Toyota India website using HTML, CSS, and JavaScript. Improved upon UI/UX flaws from the original by enhancing navigation, layout consistency, and visual design. Built all sections including homepage, product pages, and interactive features individually.

Certification

Mind Sprint - 48Hour **International Hackathon Code Quest -**

Coding competition

google cloud -Gen AI(coursera)

edunet internship training
